

Chart Sentry®

The ReDoc Document Management and Scanning System

Common Problem: "I'm sick and tired of trying to find, pull, and file charts. I hate traveling to remote sites to retrieve charts and then having to select specific notes. Once I find the chart, I have to get missed signatures, and re-file claims with supporting documentation. What a nightmare!"

What is it?

ChartSentry® from **GalacTek™ Corporation** is a comprehensive information management solution that brings the concept of the "Paperless Practice" closer than ever before.

How does it work?

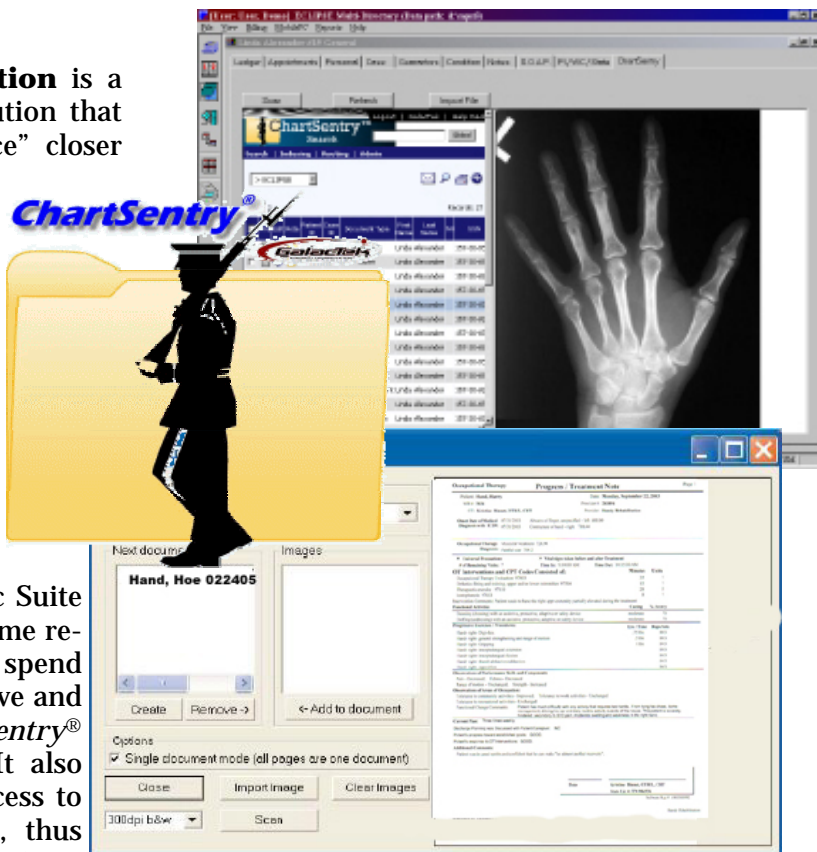

Through scanning and an automatic interface with the ReDoc Suite, **ChartSentry®** provides instant access to patient records and other office documents.

Why does it matter?

Using **ChartSentry®** with ReDoc Suite can help your staff spend less time retrieving and copying charts and spend more time on other administrative and patient related tasks. **ChartSentry®** helps reduce costs by reducing overtime. It also helps to increase revenues by having easy access to all documentation that support the charges, thus reducing denials. **ChartSentry®** and ReDoc Suite also increases the quality and organization of your charts with legible, complete, and comprehensive documentation.

ChartSentry® provides HIPPA compliance through secure document access and the use of a log-in screen and password. **ChartSentry®** also dramatically enhances productivity while reducing costs of practice operations. With ReDoc and **ChartSentry®** you may view any patient record in a matter of seconds without having to rely on the hassles of paper file systems. **ChartSentry®** and ReDoc, together, provide the security and compliance you need, while offering significant savings and increased profitability.

**Solution: The ReDoc Suite and Chart Sentry® .
Documentation the Right Way**
