

ReDoc Appointment Scheduler

rehab documentation software

Common Problem: Is your Scheduling Book giving you the **BLUES** because of lost appointments, multiple therapists, multiple locations, double booked patients, cancellations, or appointments that were moved from one day to another?

What is it?

ReDoc Appointment Scheduler is a user-friendly software tool that simplifies appointment scheduling for rehab clinics. It improves efficiency by saving your administrative staff time and also decreases no-shows and cancellations. The entire clinic will benefit from these advantages because Scheduler integrates directly with your ReDoc Suite.

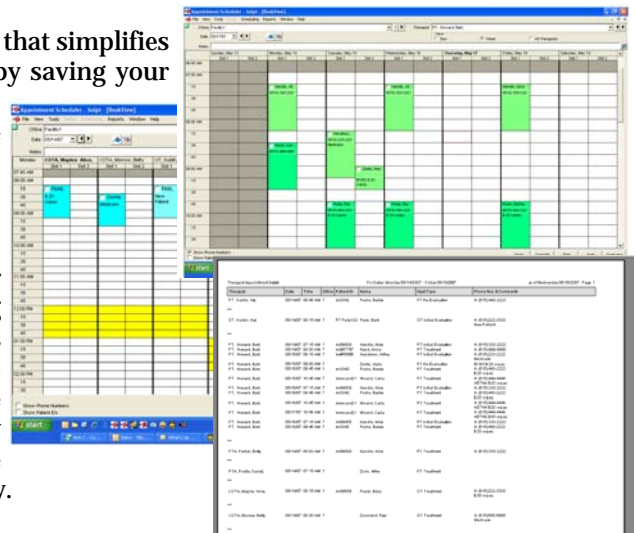

How does it work?

ReDoc Appointment Scheduler acts as a replacement to your appointment book or any outdated/under-supported scheduling software that may currently be in use. Entering appointments is fast and easy to do and patients can be scheduled for multiple time slots at once. It can display multiple days and therapists on one screen and appointments can be tracked by location. It's also easy to move appointments from one time slot to another with simple drag and drop functionality.

"We currently use Appointment Scheduling Software and it is well equipped with reports and management tools allowing us to keep track of our patients and it integrates with the patient calling system, Reminder-Pro .

'As a clinical director I am pleased that this software has decreased our labor costs by saving time scheduling appointments and tracking patient care. .

"Most importantly, Appointment Scheduling allows fast and easy appointment scheduling and rescheduling. It tracks cancellations and the reason for the cancellation. The scheduling system replaced our previous method of scheduling.

You'll be fully integrated with your ReDoc Suite so there's only one entry of patient demographic information which allows you to track...

- Number of approved visits
- Whether the scheduled patient has been seen
- Whether they have been billed for services.

This increases efficiency for the front desk, therapy, and billing personnel and virtually eliminates the potential for human error.

Why does it matter?

ReDoc Appointment Scheduler helps facilitate scheduling accuracy, it promotes referrals and streamlines workflow, and ultimately helps to increase your bottom line. And best of all, it is from one vendor... The Rehab Documentation Company. One support center helping to train and guide you.

Solution: ReDoc Suite with Appointment Scheduler.
